A screen will appear allowing the At Bat to be recorded. It also allows stolen/advanced bases, pick offs, and RBIs to be recorded. The app will not allow two players to occupy one base. However, advances beyond the minimum and runners thrown/forced out must be recorded using the "Max Base" and "Out At" drop downs. An At Bat can be revisited at any time.

# Paste Players from any Source

Players can be copied from a file or the internet and pasted into the app. First, select a delimiter to separate each field (name, number, position, etc). The app assumes each player is separated by a "New Line" character. If a team for these players does not yet exist, it can be added from this screen. The app attempts to remove headers and extraneous information like "Jr." or "Sr."

## Paste the Team Roster

The screenshot shows the 'Import Lineup' screen with the following interface elements:

- Top bar: 6:56 PM Mon May 19, 100% battery, < Back, Import Lineup, Add or update Players.
- Buttons: Add team, Cubs, Paste, Tab.
- Fields: 16, Leave Blank, Matthew Boyd, L, L, SP.
- A large table titled "SELECT A PLAYER OR SWIPE TO DELETE" is displayed, listing players from the Chicago Cubs roster. The table has columns: Name, Number, Pos, Bat Dir, Order, Team.

Name	Number	Pos	Bat Dir	Order	Team
Jameson Taillon	50	SP	R	99	Cubs
Ryan Pressly	55	RP	R	99	Cubs
Chris Flexen	77	RP	R	99	Cubs
Julian Merryweather	66	RP	R	99	Cubs
Daniel Palencia	48	RP	R	99	Cubs
Matthew Boyd	16	SP	L	99	Cubs
Miguel Amaya	9	C	R	99	Cubs
Cade Horton	22	SP	R	99	Cubs
Moises Ballesteros	25	DH	L	99	Cubs
Drew Pomeranz	45	RP	R	99	Cubs

The example above copied the Cubs roster from <https://www.cbssports.com/mlb/teams/CHC/chicago-cubs/roster>. Once the delimiter (a tab) and team is selected, identify all the fields and then select "Add or Update Players" and the players will be populated.
