Edit/Add or Delete a Game

To edit a game select an existing game or select the "Add" after selecting the date, time and teams from the drop downs. A new team can be created if it is not in the drop downs. The field name can be input. If this is a little league game where all players hit - indicate it here. An existing game can be deleted by swiping to the left. The list of Games can be sorted ↑↓ to make finding the Games easier. The "Search Field" allow filtering the Games by date, location, home or visiting team.

Edit an Existing or Newly Added Game

The Edit Game Screen also allows editing of all the same selections and inputs as above. It also includes a place to record game highlights.

Edit/Add or Delete a Team
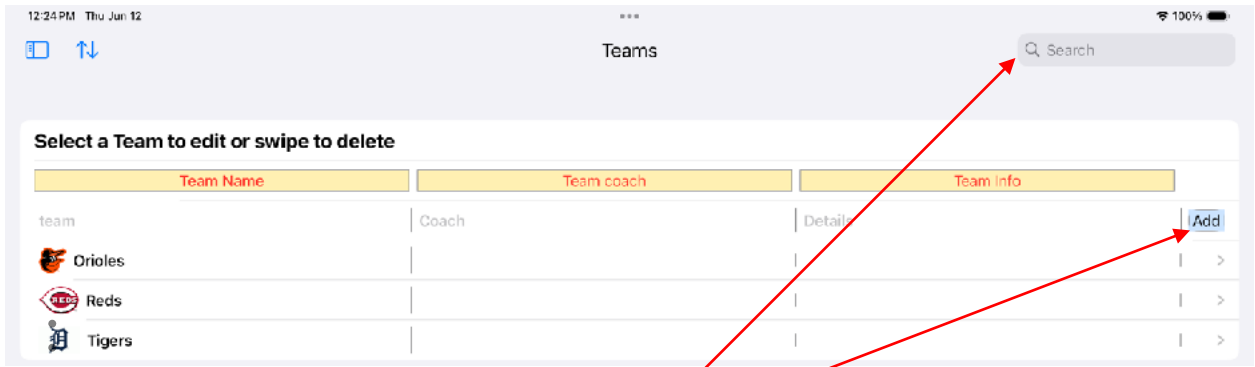

To edit a team select an existing team or select the "Add" after inputing the Team name and optionally input the Coach name and notes of any pertinent information. An existing team can be deleted by swiping to the left. Set the name of the team. The list of Teams can be sorted ↑↓ to make finding the Teams easier. The "Search Field" allow filtering the Teams by name or coach.

Edit an Existing or Newly Added Team
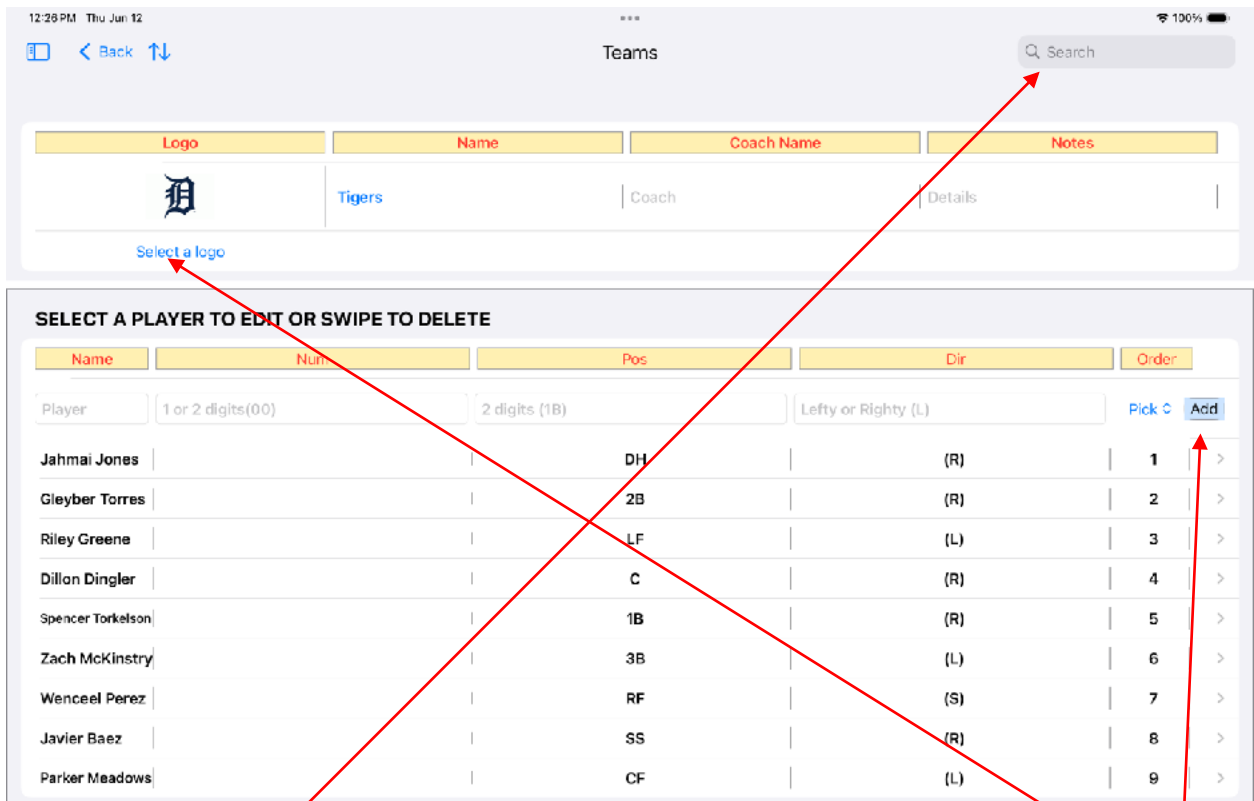

Editing a Team also allows changing the same fields as above plus selecting the Team logo from photos (if you have downloaded it or taken a picture of it). If any players have been added to this team they will show up here. Players can be edited by selecting a player or added by selecting "Add" after inputing the Players name. The list of Players can be sorted ↑↓ to make finding the Players easier. The "Search Field" allows filtering the Players by name or number.

Edit an Existing or Newly Added Player

Editing a Players also allows changing the fields input above plus selecting a Player's picture from photos (if you have downloaded it or taken a picture of it).

Score the Game

The game is now ready to be scored. To start, select the top left square

Record the At Bat

A screen will appear allowing the At Bat to be recorded. It also allows stolen/advanced bases, pick offs, and RBIs to be recorded. The app will not allow two players to occupy one base. However, advances beyond the minimum and runners thrown/forced out must be recorded using the "Max Base" and "Out At" drop downs. An At Bat can be revisited at any time.

Paste Players from any Source

Players can be copied from a file or the internet and pasted into the app. First, select a delimiter to separate each field (name, number, position, etc). The app assumes each player is separated by a "New Line" character. If a team for these players does not yet exist, it can be added from this screen. The app attempts to remove headers and extraneous information like "Jr." or "Sr.". See the example copy in the Appendix.

Paste the Team Roster

The example above copied the Cubs roster from https://www.cbssports.com/mlb/teams/CHC/chicago-cubs/roster. Selecting the whole roster on an iPad to copy it to the clipboard takes some practice. Once it is on the clipboard and the delimiter (a tab) is selected, hit the "Paste" button. Then select the team and identify where all the fields are in the pasted data using the row of light blue dropdowns across the top. The last step is to select "Add or Update Players" and the players will be populated or updated. See the example copy in the Appendix

The example above copied the Cubs starting lineup from https://www.mlb.com/starting-lineups. Once the delimiter (a space) is selected, push the paste button. Then select the Team. A new Team can be created if needed. Next identify where all the fields are in the pasted data using the row of light blue drop-downs across the top. Then select "Add or Update Players" and the players will be updated or added.

Insert Replacement Players

To insert a replacement player (Pitch Hitter or Defensive Replacement) select "Replacement Player" from the Score the Game screen.

Replace Players with Players on the Bench

This screen show all the players on the team with the option to add, delete, or change them. The "Playing Players" drop down shows who is currently playing and allows a selection of the player to be replaced. The "Incoming Payer" drop down shows who is available on the bench and allows the selection of the incoming player. Select "Do it!" To make the substitution.

From the list of players, select who will pitch. Then, if the pitcher is coming in, select from the "Start Inn" drop down the inning the pithing will start. If it is a relief pitcher, select how many outs there are from the "Start Outs" drop down and how many batters have hit in the inning from the "Start Bats" drop downs when the pitching started. If the pitcher is coming out, select from the "End Inn" drop down the inning the pithing will end. Then select how many outs there are from the "End Outs" drop down and how many batters have hit in the inning from the "End Bats" drop downs for when the pitching ended

The "Start Inn" & "Start Outs" to "End Inn" & "End Outs" are used to calculate the number of inning pitched. The "Start Inn" & "Start Bats" to "End Inn" & "End Bats" are used to calculate Hits, Runs, Ks, etc.

The list of pitchers can be sorted ↑↓ to make finding the player easier. Players can also be added + if they are not yet input.
